

KIYA 360

One Platform. Complete Business.

Integrated CRM + ERP System — 28 Modules across Front Office, Supply Chain, Manufacturing, Finance, HR
and Platform Services

BUSINESS REQUIREMENTS DOCUMENT (BRD)

Version 2.0

Prepared: 13 September 2026

Document Control

Version	Date	Author	Description
1.0	—	Business Analysis Team	Initial draft (12-module Kelvin 360 scope)
2.0	13/09/2026	Business Analysis Team	Rebased on the full KIYA 360 28-module framework, with detailed Platform & Administration requirements and enterprise positioning

Table of Contents

- 1. Executive Summary
- 2. Business Objectives
- 3. Scope
- 4. Stakeholders
- 5. Enterprise Positioning
- 6. End-to-End Business Flows
- 7. Module-wise Functional Requirements (28 modules)
- 8. Cross-Module Integration Requirements
- 9. AI & Automation Features
- 10. Non-Functional Requirements
- 11. Cross-Module (Common) Features
- 12. Assumptions & Constraints
- 13. Success Criteria / KPIs
- 14. Glossary

1. Executive Summary

KIYA 360 is a unified, cloud-based CRM + ERP platform spanning 28 modules — from front-office CRM, Sales and Marketing, through Procurement, Inventory, Warehouse, Manufacturing and Quality, to Finance, HR, Projects, E-Commerce and Business Intelligence — plus horizontal platform services for Administration, Workflow, AI, Integration, Mobile, and Audit/Security/Compliance.

This Business Requirements Document (BRD) defines the business objectives, competitive positioning, module-wise functional requirements, the three end-to-end business flows that tie every module together, and the non-functional requirements for KIYA 360. It supersedes the earlier 12-module BRD and forms the baseline for solution design, development planning and UAT sign-off.

2. Business Objectives

- Deliver a single, unified data platform that replaces the need to stitch together separate CRM, ERP, HRMS, WMS and BI systems.
- Match or exceed the functional footprint of leading enterprise suites (Oracle Fusion Cloud, Oracle NetSuite, SAP S/4HANA, SAP Business One) within one connected product.
- Provide real-time, end-to-end visibility across three core flows: Customer-to-Cash, Procure-to-Pay and Asset-to-Service.
- Standardise company, user, security, master data, numbering and notification configuration through one Platform & Administration foundation used by every module.
- Embed a global tax engine and statutory compliance (GST/VAT, withholding tax, e-invoicing/e-way bill) suitable for multi-country operation.
- Embed AI insights, predictive analytics and automation across sales, inventory, finance, maintenance and service.
- Support multi-company, multi-country, multi-currency and multi-language operation natively.
- Provide native mobile apps (Sales, Service, Dashboard, Inventory, Approvals) with offline sync for field and floor users.

3. Scope

3.1 In Scope — 28 Modules

01. Platform & Administration (fully specified — see Section 7.1)

- 02. CRM
- 03. Sales
- 04. Marketing
- 05. Customer Service
- 06. Procurement
- 07. Supplier Management
- 08. Inventory
- 09. Warehouse
- 10. Manufacturing
- 11. MRP & Planning
- 12. Quality
- 13. Asset Management
- 14. Maintenance & Field Service
- 15. Logistics & Transportation
- 16. Projects
- 17. Finance & Accounting
- 18. Tax & Statutory Compliance
- 19. HR & Payroll

- 20. E-Commerce
- 21. Document Management
- 22. Business Intelligence
- 23. EPM / Budget / Forecast
- 24. Workflow & Approvals
- 25. AI & Automation
- 26. Integration & API
- 27. Mobile Application
- 28. Audit, Security & Compliance

3.2 Out of Scope (Phase 1)

- Country-specific payroll/statutory calculations beyond India and one additional reference country
- Deep industry-specific configurators (e.g. process/recipe manufacturing) beyond discrete/BOM-based manufacturing
- Marketplace-specific storefront integrations beyond the native E-Commerce module
- Data migration/cutover services from legacy Oracle/SAP/NetSuite instances (handled under a separate implementation SOW)

4. Stakeholders

Role	Interest / Responsibility
Executive Management	Enterprise-wide visibility across sales, supply chain, manufacturing, finance and HR
Platform Administrator	Company/branch setup, users & roles, security, master data, configuration, numbering, notifications, audit
Sales, CRM & Marketing Teams	Leads, opportunities, quotations, orders, campaigns, customer 360° view
Customer Service Team	Cases, tickets, SLAs, escalations
Procurement & Supplier Management Teams	Requisitions, RFQ/RFP, purchase orders, supplier evaluation
Inventory & Warehouse Teams	Stock accuracy, batch/serial tracking, bin/location management, WMS operations
Manufacturing, MRP & Quality Teams	BOM, routing, work orders, planning, inspection, NCR/CAPA
Asset & Maintenance / Field Service Teams	Asset lifecycle, preventive/breakdown maintenance, technician dispatch
Logistics & Projects Teams	Freight/shipment tracking, project planning, budgeting and billing
Finance, Tax & EPM Teams	GL, AP/AR, tax compliance, budgeting, forecasting, consolidation
HR Team	Employee master, attendance, payroll, performance
IT / Integration & Security Team	APIs, integrations, mobile apps, audit, security and compliance policy

5. Enterprise Positioning

KIYA 360 is positioned as an "enterprise super-set" — a single platform intended to cover functional ground that otherwise requires combining multiple named enterprise suites. The table below is a schematic capability comparison for internal positioning purposes only; it is not a certification, benchmark, or claim of feature-for-feature parity with the named products.

Functional Area	Comparable Capability Typically Found In
CRM	Oracle Fusion Cloud + NetSuite + SAP Business One
Sales	All 4 (Oracle Fusion, NetSuite, SAP S/4HANA, SAP Business One)
Marketing	Oracle Fusion Cloud + NetSuite
Customer Service	Oracle Fusion Cloud + NetSuite
Finance	Oracle Fusion Cloud + NetSuite + SAP S/4HANA
Tax	Oracle + NetSuite + SAP
Procurement	All 4
Inventory	All 4
Warehouse	SAP S/4HANA + Oracle
Manufacturing	SAP S/4HANA + Oracle
MRP	SAP S/4HANA + Oracle
Quality	SAP S/4HANA + Oracle
Asset Management	SAP S/4HANA + Oracle
Maintenance	SAP S/4HANA + Oracle
Projects	Oracle Fusion Cloud
HR	Oracle Fusion Cloud
Payroll	Oracle Fusion Cloud + SAP Business One
Logistics	SAP S/4HANA + Oracle
Transportation	SAP + Oracle
E-commerce	NetSuite + Oracle
Business Intelligence	Oracle Fusion Cloud
EPM / Budgeting	Oracle Fusion Cloud
Document Management	Oracle Fusion Cloud
Workflow / Approval	All 4 + KIYA Engine
Global Tax	All 4
Multi-Company	All 4
Multi-Country	All 4
Multi-Currency	All 4
Multi-Language	Oracle / NetSuite / SAP

AI	All 4
API / Integration	All 4

6. End-to-End Business Flows

Every module ultimately serves one of three interconnected, end-to-end flows. Requirements in Section 7 should be traced back to the flow(s) they support.

6.1 Customer to Cash (Sales Flow)

Lead -> Opportunity -> Enquiry -> Quotation -> Sales Order -> Availability Check -> Inventory -> MRP / Planning -> Production -> Quality Check -> Warehouse -> Dispatch -> Invoice -> Tax -> Payment -> Accounting -> Profitability -> Customer History

6.2 Procure to Pay (Supplier Flow)

Supplier -> RFQ / RFP -> Supplier Quotation -> Purchase Order -> Goods Receipt -> Quality Check -> Inventory -> Supplier Invoice -> Tax -> Payment -> Accounting -> Supplier Performance

6.3 Asset to Service (After-Sales Flow)

Asset / Machine -> Installation -> Warranty -> Service Request -> Technician Assignment -> Spare Parts -> Work Order -> Maintenance -> Service Invoice -> Payment -> Asset History

6.4 Key Enablers (All Flows)

- Workflow & Approvals
- Document Management
- AI & Automation
- Integration & API
- Mobile Application
- Audit & Security

6.5 Global Capabilities (Across All Modules)

- Multi-Company
- Multi-Country
- Multi-Currency
- Multi-Language
- 24/7 Operations
- Scalable Architecture
- Data Security
- Role Based Access

7. Module-wise Functional Requirements

Section 7.1 (Platform & Administration) is fully specified down to sub-sub-module level with a worked example, reflecting the reference mockups. Sections 7.2 onward cover the remaining 27 modules at sub-module level; these should be expanded to the same depth as Platform & Administration during detailed design.

7.1 01. Platform & Administration

The foundation of KIYA 360. It controls companies, users, access, master configuration, numbering, notifications and system-wide settings, ensuring security, standardisation and smooth operation across every other module.

Connected Modules: All modules (Master Data, Finance, HR, CRM, Sales, Procurement, Inventory, etc.)

Functional Requirements (with worked examples)

Req ID	Requirement
1.1	Company Setup
FR-PADM-1.1.1	Company Master — company details, business type, legal entity, fiscal year, currency, tax registration
FR-PADM-1.1.2	Branch Master — branch details, address, contact, time zone, operating hours
FR-PADM-1.1.3	Business Unit — unit master, product line, profit center, cost center
FR-PADM-1.1.4	Department — department master, head, cost center, reporting line
FR-PADM-1.1.5	Division — division master, strategy, business area, KPI
FR-PADM-1.1.6	Location — location master, geo location, plant/warehouse, GPS
Example	Company: Kelvinotherm Induction LLP · Branch: Ahmedabad · Business Unit: Induction Furnace · Division: Manufacturing · Department: Production · Location: Vatva GIDC, Ahmedabad
1.2	Users & Roles
FR-PADM-1.2.1	User Management — create user, edit user, deactivate
FR-PADM-1.2.2	Role Management — role master, role assignment
FR-PADM-1.2.3	Permission Management — module access, data access
FR-PADM-1.2.4	Approval Authority — approval levels, delegation
FR-PADM-1.2.5	User Groups — group master, group assignment
FR-PADM-1.2.6	Session Management — login history, active sessions
Example	User: Ramesh Shah · Role: Sales Manager · Permissions: Sales, CRM, Quotation · Approval Authority: Up to Rs 10 Lakhs
1.3	Security & Access

FR-PADM-1.3.1	Login & Authentication — password policy, 2FA/MFA
FR-PADM-1.3.2	IP Restrictions — allowed IP, blocked IP
FR-PADM-1.3.3	Device Management — device list, device control
FR-PADM-1.3.4	Data Encryption — at rest, in transit
FR-PADM-1.3.5	Session Security — timeout, concurrent login
FR-PADM-1.3.6	Access Control — RBAC, data-level security
Example	2FA Enabled · Login from Known Device · IP: 103.22.14.56 (Allowed)
1.4	Master Data Management
FR-PADM-1.4.1	Customer Master — customer details, credit limit
FR-PADM-1.4.2	Supplier Master — supplier details, tax info
FR-PADM-1.4.3	Item Master — item code, category, HSN/SAC
FR-PADM-1.4.4	Employee Master — employee details, department
FR-PADM-1.4.5	Tax Master — tax type, rate, jurisdiction
FR-PADM-1.4.6	Currency Master — currency, exchange rate
FR-PADM-1.4.7	UOM Master — unit, conversion, category
Example	Item: IF-1500 · Category: Induction Furnace · HSN/SAC: 8514 · UOM: Nos
1.5	Configuration
FR-PADM-1.5.1	System Settings — general, regional, date/time
FR-PADM-1.5.2	Financial Settings — accounting, currency, fiscal year
FR-PADM-1.5.3	Sales Settings — pricing, discount, order
FR-PADM-1.5.4	Purchase Settings — approval, PO, GRN
FR-PADM-1.5.5	Inventory Settings — stock valuation, reorder
FR-PADM-1.5.6	Manufacturing Settings — BOM, routing, work order

FR-PADM-1.5.7	Service Settings — warranty, AMC, field service
Example	Sales Setting: Price List · Tax Setting: GST · Inventory Setting: FIFO
1.6	Numbering Series
FR-PADM-1.6.1	Document Series — sales order, purchase order
FR-PADM-1.6.2	Transaction Series — invoice, payment, receipt
FR-PADM-1.6.3	Master Series — customer, supplier, item
FR-PADM-1.6.4	Project Series — project, task, milestone
FR-PADM-1.6.5	Service Series — service request, work order
FR-PADM-1.6.6	Asset Series — asset, maintenance
Example	Sales Order Series: SO-2025-0001 · Invoice Series: INV-2025-0001 · PO Series: PO-2025-0001
1.7	Notifications
FR-PADM-1.7.1	Email Notifications — transactional, marketing
FR-PADM-1.7.2	WhatsApp Notifications — alerts, approval
FR-PADM-1.7.3	SMS Notifications — OTP, reminders
FR-PADM-1.7.4	Push Notifications — mobile app, desktop
FR-PADM-1.7.5	In-App Notifications — system alerts, task
FR-PADM-1.7.6	Notification Templates — email, SMS, WhatsApp
Example	Order Approved -> Email + WhatsApp Notifications sent to Sales Manager
1.8	Audit Trail
FR-PADM-1.8.1	Login Log — user, date/time, device
FR-PADM-1.8.2	Data Change Log — old value, new value, table
FR-PADM-1.8.3	Transaction Log — module, action, IP address
FR-PADM-1.8.4	Approval Log — approver, status, remarks
FR-PADM-	API Log — API call, response, error

1.8.5	
FR-PADM-1.8.6	Report Log — generated by, date, format
Example	User: Anita Sharma · Action: Updated Customer · Table: Customer Master · Old Value: 100000 · New Value: 100001 · Time: 2025-05-10 14:32

7.2 02. CRM

Manages leads through to a unified customer view across the full relationship lifecycle.

Functional Requirements

Req ID	Requirement
FR-CRM-001	Leads
FR-CRM-002	Opportunities
FR-CRM-003	Accounts
FR-CRM-004	Contacts
FR-CRM-005	Activities
FR-CRM-006	Pipeline Management
FR-CRM-007	Campaigns
FR-CRM-008	Customer 360 View

7.3 03. Sales

Covers enquiry-to-cash: quotations, orders, pricing, dispatch, returns and analytics.

Functional Requirements

Req ID	Requirement
FR-SALES-001	Enquiries
FR-SALES-002	Quotations
FR-SALES-003	Sales Orders
FR-SALES-004	Pricing & Discounts
FR-SALES-005	Delivery & Dispatch
FR-SALES-006	Returns
FR-SALES-007	Credit Memos
FR-SALES-008	Sales Analytics

7.4 04. Marketing

Plans and measures campaigns and lead-generation activity across channels.

Functional Requirements

Req ID	Requirement
FR-MKT-001	Campaigns
FR-MKT-002	Email Marketing
FR-MKT-003	Digital Marketing
FR-MKT-004	Events & Webinars
FR-MKT-005	Lead Generation
FR-MKT-006	Market Analysis
FR-MKT-007	Marketing Analytics

7.5 05. Customer Service

Handles post-sale support cases, tickets and SLA-driven service delivery.

Functional Requirements

Req ID	Requirement
FR-CSVC-001	Case Management
FR-CSVC-002	Service Tickets
FR-CSVC-003	Knowledge Base
FR-CSVC-004	SLA Management
FR-CSVC-005	Customer Feedback
FR-CSVC-006	Escalations
FR-CSVC-007	Service Analytics

7.6 06. Procurement

Runs requisition-to-receipt procurement with competitive sourcing.

Functional Requirements

Req ID	Requirement
FR-PROC-001	Purchase Requisition
FR-PROC-002	RFQ / RFP
FR-PROC-003	Supplier Quotations

FR-PROC-004	Purchase Orders
FR-PROC-005	Goods Receipt
FR-PROC-006	Returns
FR-PROC-007	Procurement Analytics

7.7 07. Supplier Management

Maintains supplier master data, classification, evaluation and a supplier self-service portal.

Functional Requirements

Req ID	Requirement
FR-SUPM-001	Supplier Master
FR-SUPM-002	Supplier Classification
FR-SUPM-003	Supplier Evaluation
FR-SUPM-004	Contracts
FR-SUPM-005	Performance Scorecard
FR-SUPM-006	Supplier Portal

7.8 08. Inventory

Tracks stock quantity, batch/serial, transfers, cycle counts and valuation in real time.

Functional Requirements

Req ID	Requirement
FR-INV-001	Item Master
FR-INV-002	Stock Quantity
FR-INV-003	Batch / Serial Tracking
FR-INV-004	Stock Transfers
FR-INV-005	Cycle Counting
FR-INV-006	Stock Valuation
FR-INV-007	Inventory Analytics

7.9 09. Warehouse

Manages warehouse layout, inbound/outbound flow and pick-pack-ship execution.

Functional Requirements

Req ID	Requirement
FR-WH-001	Warehouse Setup
FR-WH-002	Bin Locations
FR-WH-003	Inbound Management
FR-WH-004	Outbound Management
FR-WH-005	Picking & Packing
FR-WH-006	Warehouse Transfers
FR-WH-007	WMS Analytics

7.10 10. Manufacturing

Manages BOM, routing, work orders and shop-floor production execution and costing.

Functional Requirements

Req ID	Requirement
FR-MFG-001	BOM Management
FR-MFG-002	Routing
FR-MFG-003	Work Orders
FR-MFG-004	Production Planning
FR-MFG-005	Shop Floor Execution
FR-MFG-006	Costing
FR-MFG-007	By-Products / Co-products

7.11 11. MRP & Planning

Balances demand, material requirements, capacity and supply across production.

Functional Requirements

Req ID	Requirement
FR-MRP-001	Demand Planning
FR-MRP-002	Material Requirements
FR-MRP-003	Capacity Planning
FR-MRP-004	Production Planning
FR-MRP-005	Supply Planning
FR-MRP-006	Schedule Planning

FR-MRP-007	MRP Analytics
------------	---------------

7.12 12. Quality

Enforces inspection and quality control from incoming goods through final inspection, with NCR/CAPA.

Functional Requirements

Req ID	Requirement
FR-QLTY-001	Quality Planning
FR-QLTY-002	Incoming Inspection
FR-QLTY-003	In-Process Inspection
FR-QLTY-004	Final Inspection
FR-QLTY-005	Quality Control
FR-QLTY-006	NCR / CAPA
FR-QLTY-007	Quality Analytics

7.13 13. Asset Management

Tracks fixed assets from classification through depreciation and end-of-life.

Functional Requirements

Req ID	Requirement
FR-AST-001	Asset Master
FR-AST-002	Asset Classification
FR-AST-003	Asset Tracking
FR-AST-004	Asset Depreciation
FR-AST-005	Asset Valuation
FR-AST-006	Asset Lifecycle
FR-AST-007	Asset Analytics

7.14 14. Maintenance & Field Service

Plans preventive/breakdown maintenance and dispatches field service technicians.

Functional Requirements

Req ID	Requirement
--------	-------------

FR-MFS-001	Maintenance Planning
FR-MFS-002	Work Orders
FR-MFS-003	Preventive Maintenance
FR-MFS-004	Breakdown Maintenance
FR-MFS-005	Spare Parts Management
FR-MFS-006	Service Contracts
FR-MFS-007	Field Service

7.15 15. Logistics & Transportation

Plans freight, shipments and carriers with end-to-end tracking and delivery confirmation.

Functional Requirements

Req ID	Requirement
FR-LOG-001	Logistics Planning
FR-LOG-002	Freight Management
FR-LOG-003	Shipment Management
FR-LOG-004	Carrier Management
FR-LOG-005	Tracking & Tracing
FR-LOG-006	Delivery Confirmation
FR-LOG-007	Logistics Analytics

7.16 16. Projects

Plans, budgets, executes and bills projects with resource and time tracking.

Functional Requirements

Req ID	Requirement
FR-PROJ-001	Project Planning
FR-PROJ-002	Project Budgeting
FR-PROJ-003	Project Execution
FR-PROJ-004	Resource Planning
FR-PROJ-005	Time & Expense
FR-PROJ-006	Project Billing
FR-PROJ-007	Project Analytics

7.17 17. Finance & Accounting

Core financials — general ledger, payables/receivables, cash, fixed assets and reporting.

Functional Requirements

Req ID	Requirement
FR-FIN-001	General Ledger
FR-FIN-002	Accounts Payable
FR-FIN-003	Accounts Receivable
FR-FIN-004	Cash & Bank
FR-FIN-005	Fixed Assets
FR-FIN-006	Cost Accounting
FR-FIN-007	Financial Reporting

7.18 18. Tax & Statutory Compliance

Applies a global tax engine and country-specific rules across GST/VAT, withholding tax, e-invoicing and statutory filing.

Functional Requirements

Req ID	Requirement
FR-TAX-001	Global Tax Engine
FR-TAX-002	Country Tax Rules
FR-TAX-003	GST / VAT / Sales Tax
FR-TAX-004	Withholding Tax
FR-TAX-005	E-Invoicing / E-Way Bill
FR-TAX-006	Tax Returns
FR-TAX-007	Statutory Reports

7.19 19. HR & Payroll

Manages the employee lifecycle from master data through attendance, payroll and performance.

Functional Requirements

Req ID	Requirement
FR-HR-001	Employee Master
FR-HR-002	Organization Management
FR-HR-003	Attendance & Leave
FR-HR-004	Payroll Processing
FR-HR-005	Benefits Management
FR-HR-006	Performance Management
FR-HR-007	HR Analytics

7.20 20. E-Commerce

Runs an online storefront with catalog, cart, checkout and customer self-service.

Functional Requirements

Req ID	Requirement
FR-ECOM-001	Online Store
FR-ECOM-002	Product Catalog
FR-ECOM-003	Shopping Cart
FR-ECOM-004	Order Management
FR-ECOM-005	Payment Gateway
FR-ECOM-006	Promotions
FR-ECOM-007	Customer Portal

7.21 21. Document Management

Centralises document capture, versioning, sharing and e-signature across the platform.

Functional Requirements

Req ID	Requirement
FR-DOCM-001	Document Capture
FR-DOCM-002	Document Storage
FR-DOCM-003	Version Control
FR-DOCM-004	Document Sharing
FR-DOCM-005	Access Control
FR-DOCM-006	Document Workflow
FR-DOCM-007	Digital Signatures

7.22 22. Business Intelligence

Delivers dashboards, KPIs, ad-hoc and predictive analytics on top of every module's data.

Functional Requirements

Req ID	Requirement
FR-BI-001	Dashboards
FR-BI-002	Reports
FR-BI-003	KPI Management
FR-BI-004	Data Visualization
FR-BI-005	Ad-hoc Analysis
FR-BI-006	Predictive Analytics
FR-BI-007	BI Mobile App

7.23 23. EPM / Budget / Forecast

Supports enterprise performance management: budgeting, forecasting and scenario/variance analysis.

Functional Requirements

Req ID	Requirement
FR-EPM-001	Budgeting
FR-EPM-002	Forecasting
FR-EPM-003	Financial Planning
FR-EPM-004	Scenario Planning
FR-EPM-005	Consolidation
FR-EPM-006	Variance Analysis
FR-EPM-007	EPM Analytics

7.24 24. Workflow & Approvals

A no-code workflow/approval engine used across every module (KIYA Engine).

Functional Requirements

Req ID	Requirement
FR-WFA-001	Workflow Builder
FR-WFA-002	Approval Matrix
FR-WFA-003	Escalation Rules
FR-WFA-004	Delegation
FR-WFA-005	Notifications
FR-WFA-006	Audit Trail
FR-WFA-007	Mobile Approvals

7.25 25. AI & Automation

Embeds AI insights, predictive analytics, RPA bots and a conversational assistant across the suite.

Functional Requirements

Req ID	Requirement
FR-AIAU-001	AI Insights
FR-AIAU-002	Predictive Analytics
FR-AIAU-003	Process Automation
FR-AIAU-004	RPA Bots
FR-AIAU-005	AI Chat Assistant
FR-AIAU-006	Anomaly Detection
FR-AIAU-007	Machine Learning

7.26 26. Integration & API

Connects KIYA 360 to third-party systems via managed APIs, webhooks and middleware.

Functional Requirements

Req ID	Requirement
FR-INTG-001	API Management
FR-INTG-002	System Integration
FR-INTG-003	Data Sync
FR-INTG-004	Webhooks
FR-INTG-005	Third Party Apps
FR-INTG-006	Middleware
FR-INTG-007	Integration Monitoring

7.27 27. Mobile Application

Native apps mirroring Sales, Service, Dashboard and Inventory workflows with offline sync.

Functional Requirements

Req ID	Requirement
FR-MOB-001	Sales App
FR-MOB-002	Service App
FR-MOB-003	Dashboard App
FR-MOB-004	Offline Sync App
FR-MOB-005	Inventory App
FR-MOB-006	Push Notifications

FR-MOB-007	Approvals App
------------	---------------

7.28 28. Audit, Security & Compliance

Governs policy, access, data security and risk across the whole platform.

Functional Requirements

Req ID	Requirement
FR-ASC-001	Policy Management
FR-ASC-002	Access Control
FR-ASC-003	Data Security
FR-ASC-004	Risk Management
FR-ASC-005	Security Monitoring

8. Cross-Module Integration Requirements

- CRM -> Sales: qualified leads/opportunities convert into enquiries and quotations without re-entry.
- Sales -> Inventory/Warehouse: sales orders run an availability check against real-time stock and reserve inventory; dispatch reduces stock.
- Sales -> MRP/Planning -> Manufacturing: unmet demand feeds demand/MRP planning, which generates production and work orders.
- Manufacturing -> Quality: work-in-process and finished goods pass through incoming/in-process/final inspection before warehouse put-away.
- Sales/Procurement -> Finance & Tax: every invoice (customer or supplier) posts to the General Ledger and AP/AR, and is classified by the Global Tax Engine for GST/VAT and e-invoicing/e-way bill.
- Procurement -> Supplier Management: RFQ/RFP and purchase order activity feeds the supplier performance scorecard.
- Asset Management -> Maintenance & Field Service: installed assets under warranty generate service requests, work orders and spare-parts consumption, closing back to Asset History.
- Projects -> Finance: project time & expense and billing post into Accounts Receivable and Cost Accounting.
- All Modules -> Business Intelligence / EPM: every transaction streams into dashboards, KPI management and budget/forecast variance analysis in real time.
- All Modules -> Workflow & Approvals: any module can attach an approval matrix/escalation rule via the shared KIYA Engine rather than building bespoke approval logic.
- All Modules -> Audit, Security & Compliance: every create/update/delete and login event is captured in the audit trail, regardless of originating module.

9. AI & Automation Features

Feature	Description
AI Insights	Surfaces trends and recommended actions across sales, inventory, finance and service.
Predictive Analytics	Forecasts demand, cash flow and maintenance needs ahead of time.
Process Automation / RPA Bots	Automates repetitive multi-step tasks (e.g. invoice matching, data entry) without custom code.
AI Chat Assistant	Conversational assistant for in-app guidance and quick data lookups.
Anomaly Detection	Flags unusual transactions, stock movements or spending patterns for review.
Machine Learning Models	Underpins scoring, forecasting and classification features across modules.

10. Non-Functional Requirements

Category	Requirement
Unified Platform	Single data model spanning all 28 modules — no duplicate master data between CRM, ERP, and back-office systems.
Real-time Insights	Every dashboard and report reflects transactions the moment they are posted, across companies and branches.
Smart Automation	Workflow builder, approval matrix and RPA bots reduce manual, repetitive processing.
Global Tax Engine	Built-in support for GST/VAT/Sales Tax, withholding tax, e-invoicing/e-way bill and statutory reports across countries.
AI Powered	AI insights, predictive analytics and a chat assistant embedded across modules.
Mobile First	Native Sales, Service, Dashboard, Inventory and Approvals apps with offline sync.
Secure & Scalable	RBAC, data encryption at rest/in transit, device and session controls, and an architecture that scales with company/branch/user growth.
Multi-Company / Multi-Country	Manages multiple legal entities, countries, currencies and languages from one instance.
24/7 Operations	Always-on availability with continuous support.

11. Cross-Module (Common) Features

- Notifications & Reminders (Email, SMS, WhatsApp, Push, In-App)
- Calendar
- Approval Workflow (KIYA Engine)
- Audit Trail
- Multi-Company / Multi-Country / Multi-Currency / Multi-Language
- Document-to-document linking
- Real-time Web-Mobile sync
- Role-Based Access Control (RBAC)
- Create / Edit / View / Duplicate
- Approve / Reject / Cancel via the shared Workflow & Approvals engine
- Search / Filter / Sort
- Automatic Numbering per document/master type (Numbering Series)
- Attachments & Document linking (Document Management)
- PDF Generation, Print, Share
- Excel/PDF Export
- Company/Branch context switcher available on every screen

12. Assumptions & Constraints

- India is the primary tax jurisdiction for Phase 1 (GST); the Global Tax Engine architecture supports adding further country tax rule sets incrementally.
- Existing master data (companies, branches, customers, suppliers, items, employees) will be imported via the Master Data Management module prior to go-live.
- Users have stable internet connectivity for the cloud platform; the Mobile Application module provides offline sync for intermittent-connectivity scenarios.

- The competitive positioning in Section 5 is directional and for internal stakeholder communication; it does not constitute a feature-parity guarantee.

13. Success Criteria / KPIs

- Reduction in Customer-to-Cash cycle time (lead to payment collected)
- Reduction in Procure-to-Pay cycle time (requisition to supplier payment)
- Reduction in unplanned asset downtime via preventive maintenance scheduling
- Improved on-time statutory/tax filing rate
- Reduction in duplicate master data entries across modules
- Improved inventory accuracy (system vs. physical stock variance)
- Increased self-service adoption via Mobile Application and Customer/Supplier portals

14. Glossary

Term	Definition
BOM	Bill of Materials
RFQ/RFP	Request for Quotation / Request for Proposal
GRN	Goods Receipt Note
MRP	Material Requirements Planning
NCR/CAPA	Non-Conformance Report / Corrective and Preventive Action
EPM	Enterprise Performance Management
RBAC	Role-Based Access Control
RPA	Robotic Process Automation
WMS	Warehouse Management System
GST/VAT	Goods & Services Tax / Value Added Tax
GSTIN	GST Identification Number
CIN	Corporate Identification Number
AMC	Annual Maintenance Contract
SLA	Service Level Agreement
2FA/MFA	Two-Factor / Multi-Factor Authentication
